Corps Seminar 23 – 24 Oct 08
'RAEME SPIRIT: PAST, PRESENT AND FUTURE'
Nomination Form Enclosed

DHOC

Here we are in 2008 and with Christmas and Easter out of the way, I expect that we are all off and racing – *situation normal*. However, it has been a busy and tragic start to 2008 for the Corps with the loss of another two of our serving RAEME brethren with CAPT Strowger and CFN Holloway both passing away over the Dec/Jan period. Our thoughts and condolences go out to their families. I received a very nice letter from CAPT Strowger's wife who was overwhelmed at the response and support that she and her family received from both the Unit and the Corps. It made a very real difference and in a way, shows that RAEME is a unique Corps with a true sense of Brotherhood.

You may not know, but our HOC, BRIG Welch, has set the theme for the 2008 RAEME Corps Seminar which will be *The RAEME Spirit: Past, Present and Future*. Given how busy we all are with the operational tempo, new equipments, and evolving maintenance system while having to deal with some significant vacancies across all trades and units, I fully agree that it is important that we take a breath and refresh ourselves on those ideals, values and traditions that makes our Corps so strong.

After all, everyone in the Corps has experienced those times and environments where no sane person would be working. However, as a Corps, we know the job has to be done and we get stuck in and do it every time. For the past 66 years, by day and by night, regardless of season, weather or terrain, the Craftsmen of the Royal Australian Electrical and Mechanical Engineers are always on the job. Therefore, in today's busy and complex environment, it would be very easy to 'forget' who we are and if we allowed that to happen, we would not be doing ourselves, our Corps or Army a service.

Hence, the Corps Seminar is going have a look our ideals, values and traditions and see if they can be refreshed and reapplied to the future. The Corps Seminar traditionally comprises of the *Olds & Bolds* of the Corps and while their input is invaluable, it would be terrific to see some of the new generation of Crafties attend and participate as you are the future of the Corps.

Our Corps is well renowned across Army for its unique and strong *Spirit de Corps*. In 2008, I believe that we will need this sense of Brotherhood more than ever in order to continue to meet the challenges that the year promises to hold. Following a fresh look at our ethos and '*With Skill and Fighting*'; RAEME will continue to get the job done.

LTCOL Nick Stanton, DHOC
Nick.stanton@defence.gov.au Ph (02) 6055 4689

SO2 Corps

2008 RAEME Corps Seminar

The 2008 Corps Seminar will be conducted 23-24 Oct 08 at the Central Instructional Facility at South Bandiana. These dates are different to the dates publicised in the recent RAEME Craftsman magazine so please update your diaries. As already outlined by the DHOC, the theme for this year is 'RAEME Spirit: Past, Present and Future'. I am sure this will invoke interesting discussion.

The seminar will also consist of a number of key activities:

- Announcement of Corps Awards;
- Briefs by civilian industry;
- Updates on key strategic maintenance issues;
- Personnel and equipment capability updates; and
- Open forum

Maintenance Manager Pre appointment Seminar

This seminar will again be sponsored by DTR-A and conducted prior to the Corps Seminar; 21-22 Oct 08. This seminar provides guidance on current maintenance management techniques and information, which will benefit those proceeding on posting as TST / ASM or as independent maintenance managers. A signal will be released in July requesting attendance of selected personnel to be funded by DTR-A. **All** other Corps members are invited to attend at their own cost.

Corps Awards

To ensure that Corps Awards are given due consideration, I request all following appointments and agencies responsible for nominating Corps members for awards, be aware of the requirements detailed in the relevant Corps Instructions for Corps Awards:

COLCOMDT's, RAEME Regional Representatives / CO/OC – Corps Instr 17 Craftsman of the Year
RAMS / ASEME / ASLO - Corps Instr 11 – Artificer and Regimental Award
RAMS / ASEME – Corps Instr 28 – BRIG Martins OBE Encouragement Award
ASLO – Corps Instr 20 – Junior Regimental Award
ASLO – Corps Instr 22 – Peter Jennings Award

Timely commencement of nomination processes within your remit will provide every opportunity to have your candidates appropriately recognised.

Critical Employment Category Retention Bonus

It is pleasing to note that the ADF Recruitment and Retention Strategy has recognised four RAEME trades as eligible for the Critical Employment Category Retention (CECR) bonus. The trades are: ECN 421 TECHNICIAN ELECTRONIC, ECN 418 TECHNICIAN ELECTRICAL, ECN 412 TECHNICIAN AVIONICS and ECN 008 ARTIFICER AVIONICS. This is a significant acknowledgement of the retention issues facing the Corps. The Stay Army website, <http://www.army.gov.au/stayarmy/>, is to be updated in early Apr 08 with details of the offer process for the retention benefit. Those eligible for the retention benefit are recommended to be conversant with the conditions that relate to this bonus.

Again, I ask that commanders at all levels pass the Corps newsletter to **all** of our soldiers.

MAJ John Haley, SO2 Corps RAEME
john.haley@defence.gov.au Ph (02) 6055 2193

SO2 Heritage

Craftsman Magazine

The Craftsman Magazine is a long standing tradition within the heritage of the corps. The long serving publishers of the magazine have recently been taken over by a new corporation which has chosen not to continue to publish the Craftsman. We are currently experiencing difficulty in identifying a publisher to take on the publication of the Craftsman Magazine. We are in discussions with one particular agency however due to the time frame associated with establishing the contract and for the publishing house to sell sufficient advertising to meet the cost of the publication we will be unable to produce a mid-year edition this year. Please keep the articles coming in and we will use them in the end of year publication.

Corps Subscriptions

It is great to see new members contributing to corps subscriptions and receiving their St Eligius Corps Medallion. Twice a year we conduct a Medallion Number Raffle Draw coinciding with the publication of the Craftsman magazine. The winner of the medallion draw will receive a quality Leatherman Wave Multi tool.

One of the key activities supported by corps funds is the annual corps awards that are available for presentation each year. Each recipient receives a certificate from the HOC and a gold framed Award version of the Prince Philip Banner Miniature. The 2007 award recipients were announced at the Corps seminar in October. The quality of the nominations was very high and all the award recipients and those nominated are to be congratulated. Award recipients are detailed in this edition.

Another initiative supported by the corps fund has been Operation Spanner Pack. Op Spanner Pack is a project undertaken by the RAEME Associations where by they are sending care packages to all RAEME soldiers deployed over seas on operational service. This is a great initiative by the associations and further demonstrates the 'brotherhood' of the corps. Soldiers who receive a care package are encouraged to provide feedback to the association.

Prince Philip Banner Miniatures

The sale of the second release of the RAEME Prince Philip Banner Miniature continues to go well. At the current rate the limited release will sell out over the 3 – 6 months. Once the existing stocks are extinguished there will not be any more made so if you would like to own one don't leave it too long.

CORPS RSM

This is my second report as Corps RSM and find it hard to believe that six months has gone past. I have enjoyed the year so far and found it all I expected and then some. During this time I have had the opportunity to speak to and receive feedback on a number of issues from the soldiers of the Corps as they attend courses at ASEME and ASLO.

Issues highlighted range from retention and remuneration to maintaining Espirit de Corps, I view all of these matters as of great importance, and they have been raised at higher levels and we are working to seek their resolution.

An issue that is becoming increasingly raised is the flying of the RAEME Tricolour. A number of Corps are becoming annoyed at the flying of the Tricolour and the unique sense of pride and the Espirit de Corps it engenders. Corps instruction No 3 The RAEME Corps Flag gives specific instruction in regard to flying of both the Tricolour and the Corps Flag. We must continue to fly the Tricolour with pride as it is something no other Corps has.

As you would know, we have only one RSM out of the 176 that are employed within Army. We are the second largest Corps, I see this as a real mismatch given our capability. Currently, two of our Corps coded SM positions are being filled by other Corps, this is not an acceptable situation. Army needs to see that we are capable of being the soldier tradesmen that we pride ourselves as. To achieve this we need to posture ourselves to become more competitive and have a suite of people to fill these positions. To allow us to improve in this area we need our soldiers exposed to out-of-trade postings. These postings will allow our CPLs and SGTs to broaden their All Corps Soldier Skills and compete against peers from across Army thus gaining an edge and valuable experience should they wish to pursue a Regimental career on promotion to WO2.

Currently there are positions out-of-trade at RMC, ARTC, LWC Vic, DFR and ADFA for SGTs and ARTC and DFR for CPLs, and the craftie has not been forgotten with one slot available at the Fed Guard next year. Considering an out-of-trade posting is even more important with the expansion of Army as our 2009 requirement at ARTC Kapooka will be 13 CPLs and 6 SGTs. Postings to ARTC, as well as being professionally rewarding and meeting the CA directive in regard to employment with TC-A, are well remunerated with a \$10,000 attraction bonus and \$10,000 PA completion bonus. All positions are available to both ground and aero trades and we currently have two RAEME Aviation trade background WO2s filling SM positions in TC-A and LC. Filling an out-of-trade posting will not end your career as a tradesman; it is an opportunity to experience something different in Army. If you are interested speak to your ASM or submit an EPAR to SCMA.

Recognition of our exceptional young Crafties is something that we are very good at and again it is time to begin putting pen to paper and draft your nominations for the Craftsman of the Year. Nominations need to be at your RAEME Regional Rep by the end of June with the National award to be selected by September. RAEME CI 17 details the requirements of the nomination. The 2007 National winners ARA and ARES received their awards at the Corps conference and were able to provide vital insight with their contribution to discussion on retention and the Crafties view of life in the Army and the Corps.

Until next time or I see you over a beer at a Spanner Club.

SO2 Air Trades Report

RAEME in support of Army Aviation

This year saw LTCOL Chris Hadzi take the reins as CO/CI of the RAEME Aircraft Maintenance School (RAMS). Previously RAMS was a sub-unit within the AAVNTC but now is a RAEME unit providing technical training in support of the Army's rotary wing fleets.

RAEME Birthday Dinner. Oakey has traditionally celebrated the Corps birthday with a sports day and a Corps dinner. This year the dinner will be on the 28 Nov 08 so add it to your calendar now.

Raising of the 6th Aviation Regiment

6 Avn Regt has now formed by grouping 171 Avn Sqn (S-70A-9 Black Hawk) and 173 Survl Sqn (B300 Super King Air) into a single regiment. The unit establishment will not be fully adjusted until early 2009 and the changes necessary to fully establish the Regt will be progressively implemented by then. The unit role has been adjusted to "provide surveillance, air mobility and battlefield support in a joint, combined and inter-agency environment".

6 Avn Regt has a significant Technical and Logistics Support element representing the Corps of RAEME, RAAOC, AAvm, AAMC and RACT with the Regt HQ and 171 Avn Sqn located in Sydney and 173 Survl Sqn located at Oakey. 173 Survl Sqn aircraft technicians are qualified and employed as Licensed Aircraft Maintenance Engineers and more of what these technicians get up to will be published in the next newsletter.

5th Aviation Regiment deployment to Afghanistan

The 5 Avn Regt has deployed a CH-47D Detachment on operations in support of OP SLIPPER. The aircraft are assembled and flying with RAEME elements operating in four month rotations. The advance party departed late Jan 08 on the chartered A330 followed by the two CH-47D Chinooks on board two US C17s about a week later. The C17s dropped their cargo in Kandahar and returned to complete the final two sorties of parts and associated stores. The Main Body was the last to depart on the 08 Feb on an A330. The combined efforts of the TST completing the assembly of aircraft ahead of schedule and the aircrew completing the necessary test flying.

RAEME technicians guide the forward rotor assembly of a CH-47D during the aircraft reassembly in southern Afghanistan

Any information regarding the RAEME Aeroskills Employment Categories may be accessed via the DPERSCAP-A website, <http://intranet.defence.gov.au/ArmyWeb/sites/DPERSCAPA/comweb.asp?page=73808>, or by contacting the Employment Category management section at the Army Aviation Training Centre, Oakey.

DTR-A: Improving Army's Maintenance System through the "Maintenance Enhancement Project (MEP)"

1 Div and SOCOMD units in Brisbane, Townsville, Darwin and Sydney are set to receive additional maintenance management tools, training and onsite mentoring over the next 5 months via a funded minor project sponsored by DTR-A, the Maintenance Enhancement Project (MEP). The objective of the MEP is to improve unit maintenance processes and improve operational availability of land materiel.

Together with a similar initiative, the Maintenance Management Improvement Program (MMIP), run by Land Systems Division (LSD), the MEP aims to address a number of shortcomings in the maintenance system identified during the Land Materiel Maintenance Support Review conducted in 2005. Shortcomings include, poor utilisation of the MIMS

Maintenance Module (MMM), low confidence in the value of automated data in MMM, low utilisation of MMM scheduling functionality, and low confidence in technical data at the fleet level.

Targeting equipment operators, maintainers, maintenance planners and schedulers, four on-site mentoring teams will spend approximately 2 weeks at 1 Div and SOCOMD units where they will focus on 4 key areas:

1. Scheduling

The mentoring teams will assist ASMs and Planners to set up work groups for scheduling in MMM, collect and enter information from GM120 log books into MMM, and enable the use of Maintenance Schedule Tasks (MSTs).

2. Mentoring

The mentoring teams will coach unit staff on the use of scheduling functionality within MMM and demonstrate the use of new Standard Jobs and Application Parts Lists (APLs) for scheduled inspections and servicing that have been introduced as part of the LSD MMIP.

3. Training

The mentoring teams will, improve unit skills in MMM, aid transition to a standard maintenance process, and facilitate better collection of operator and technical data. Training for operators will focus on the entry of Operator Statistics in MMM. Maintainers will receive a demonstration of the 'end-to-end' Maintenance Management Process.

4. Process Support Tool Development

During the rollout, mentoring teams will be trialling a number of support tools designed to support maintenance staff in understanding the 'end to end' maintenance process and in sustaining the system improvement arising as a result of the MEP.

Support tools that will be trialled include:

- 'End-to-end' maintenance management process handbooks;
- Multimedia demonstration clips;
- Flip chart 'cheat sheets'; and
- Operational Compliance Framework.

Units outside 1 Div and SOCOMD will not be subject to on-site mentor visits, however; they will benefit from release of new standard jobs in MMM, streamlined maintenance processes and maintenance management tools. Non-mentored units will also have access to the MMM Help Desk and assistance via web applications.

Further information on the MEP can be found on the DTR-A intranet site by selecting the 'Maintenance' tab. Alternatively, enquires can be sent by email to JLC-ArmyMEPEquiries@drn.mil.au.

LOGWIKI - Maintenance Managers Handbook Online

DSTO has developed a new way for Defence personnel to acquire, share and develop knowledge related to logistics. The online resource, Logwiki, is a wikipedia-style knowledge database which is in a state of constant evolution. It is continually improving on the overall accuracy of the information provided, and can readily be expanded and adapted by users in response to real world changes.

The Logwiki contains the Maintenance Managers Handbook and links to supporting webpages, presentations and documents. Logwiki is available to all personnel with access to the Defence Restricted Network. Entry can be gained through <http://logwiki.dsto.defence.gov.au> or you can jump straight to Maintenance Management through <http://logwiki.dsto.defence.gov.au/x/A4Cd>.

Comments or suggestions for the future of maintenance on Logwiki can be added online or emailed to MAJ Scott Jenkinson.

Career Training Cell - RAEME Subject Four (Ground) Training

Background

RAEME Subject Four Career Courses were being run and conducted by the individual wings within ASEME. Training Management Plans (TMP's) have also been developed independently of each other which provided inconsistent requirements for RAEME trades. This had resulted in the wings developing their courses to varying degrees in different areas as they saw fit.

Inconsistent delivery included the fact that the in-house training provider delivered training for some courses but not others. When it came time for people to attend the Subject Four Warrant Officer Course, it was found that people had varying degrees of skills and knowledge. This made it difficult to have a coordinated approach with the course content and people then required individually tailored learning to assist them.

Over the last two years a systematic approach to training has begun to rectify many of these problems and streamline the training so that there is a logical progression from one course to the other. This has required the identification of areas for improvement within the Subject 4 suite of courses. Careers Training staff assisted Dev Group in developing a new CPL TMP, with the SGT and WO courses to follow. All this work has driven the idea that to better manage these career courses, they should be managed by one wing.

Currently

Due to the fact that Vehicle Technology Wing (VTW) had ownership of the bulk of the Subject 4 courses, VTW administration has taken on the courses and the staff that facilitate all Subject 4 RAEME courses. The new section created to manage this workload is now called Career Training Cell (CTC) and includes SMA training providers. Military staff represent the widest practical variety of trade groups.

CTC is responsible for the training of core subjects within the Subject 4 suite of courses while the content of trade specific training and its content remains the domain of the trade wings. This maintains consistency within the trade training areas throughout a RAEME tradesman's career.

The following staff from inception were:

OIC - Mr. Frank Romano

ASM - WO1 Bob Wood

Elec/Boffin - WO2 Mick Fernandez

VM/Fitter/Recovery/Metalsmith - WO2 Darrin Wright

Artificer course - WO2 Jon Spargo

Course managers - SGT Barry William and SGT Daniel Priems.

Staff for 2008 are:

OIC - Mr. Frank Romano

ASM - WO1 Craig McLeod

Program Manager – Mr John Gordon

Artificer course - WO2 Darrin Wright

SGT course - WO2 Rodney Hawksworth

CPL course - SGT Daniel Priems

Military Course managers/instructors - SGT Colin Goulding and SGT Troy McLaren

SMA trainers – Mr Chris Field, Mr Hugh Hanna and Mr Colin Shand

CTC is currently spread throughout the Bandiana and Bonegilla areas with plans to centralise facilities within Latchford Barracks where the facilities best meets the requirements of the courses.

Courses

The content of the courses has dramatically changed over the last two years, with many changes still to occur. The main themes that the courses offer are:

S4CPL – preliminary design within the Local Engineering Change Management Process. Specific trade training for Advanced trades people and gap technical trade training in selected areas.

S4SGT – detailed design within the Local Engineering Change Management Process.

S4WO – Technical Investigation regarding engineering problems.

All the courses have elements of maths, engineering drawings, TRF and design, and service writing.

The Artificer course has had a major change in the fact that it has now steered away from engineering projects and become more workplace orientated. This course now focuses on the conduct of Technical Investigations and Route Cause Analysis (RCA).

Current issues

Plagiarism within the courses is a major concern, with CTC having to introduce steps to counter this problem. Trainees need to understand that it is important that work submitted in their name must be their own work. Unfortunately when a

trainee decides to take a different course of action it results in disciplinary action with the possibility of the member being removed from course.

TMPs are being rewritten to stay ahead of current information being taught and to meet the requirements of the workplace. With this means the development of new information and new methods to put this information across to the trainees. This work will continue until all TMPs have been updated and the Subject 4 suite of courses more accurately reflects the needs of the workplace.
